Ref :

Structural Stability and Building Safety Certificate
For “**THE FORBES ACADEMY**” (CBSE School),
Situated at Gokak Falls, Tal. Gokak and Dist. Belagavi.

TO WHOMSOEVER IT MAY CONCERN

STRUCTURAL STABILITY AND BUILDING SAFETY CERTIFICATE

I have this day personally inspected the above mentioned School Building.
This was done to ascertain the building's structural stability and the building safety.

Brief specifications for the building Construction are :

1) Load Bearing Structure, mostly for ground floor only, just six rooms are ground plus one. All walls are in UCR Gokak stone masonry 18” thick in cement mortar. All flooring is in Yeraguntala Black stone slabs. All doors and windows are in seasoned wood frames and shutters. Almost all roofing , except for six rooms, is in AC sheets on steel trusses and purlins. The building was constructed around 1979 and is in well maintained state.

2) Stage and Programme Shed :

Shed on steel columns and Tata steel hollow sections trusses and purlins. Roofing in Aluminium sheeting. The shed was constructed in 2019.

After thorough inspection and detailed observations I am of the firm opinion that the **Building is structurally stable and is absolutely safe for the use as a School atleast for the next five years.** Hence this Certificate.
